1. Claims 1-9 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance: None of the cited prior art disclose or teach at a flyback converter with driver circuit interconnected the main switch and the auxiliary capacitor for sensing voltage at a joining node of the main switch and the auxiliary capacitor, generating a driver signal, and sending the same to the switches at the primary and the secondary sides for switching them respectively, wherein when the switch at the secondary side is turned into a closed condition, the switch at the primary side is switched to a closed condition enabling the switch at the primary side to store the electric energy of the primary winding to the auxiliary capacitor, when the switch at the secondary side is turned from the closed condition into an opened condition, the closed condition of the switch at the primary side is maintained for a predetermined period of time enabling the auxiliary capacitor to charge the primary winding until the electric energy being charged into the transformer is sufficient to cause the main switch to perform a zero voltage switch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
